

1 would come to the center and be part of both  
2 the admission process, but also the discharge  
3 process. In a lot of the other services it  
4 seemed as though the warriors were on their  
5 own.

6 And I'm curious whether or not  
7 there's any data that says, you know, if we  
8 could remediate some of this before it becomes  
9 a problem by giving proper training, by making  
10 sure that it's a holistic thing, maybe the  
11 tail-end wouldn't be as big.

12 DR. CARRIQUIRY: You know, this is  
13 another very interesting point. So, talking  
14 about the stigma, many of the things, many of  
15 the veterans report that they hesitate to seek  
16 care because they go to their superior and  
17 their superior says, "Man up." You know,  
18 "Don't be a wimp."

19 And so that's one of -- I'm not  
20 saying that this is everywhere, but we have  
21 heard reports from veterans that say, "I don't  
22 get support from my superiors to seek mental

1 healthcare."

2 So that's another one. I'm not sure  
3 about the resilience training. I don't really  
4 know how to answer that question.

5 DR. KHAN: If I may add, to the  
6 Marine Corps side of the house. My son served  
7 for five years. He came back from Afghanistan.  
8 He was a different individual altogether. And  
9 that was about seven years ago.

10 At that time, prior to discharge, he  
11 was in San Diego. For six months he had to go  
12 through becoming a civilian. And they pounded  
13 on him, pounded on him that you have to seek.  
14 On top of it, me being a combat veteran, I made  
15 sure that he was prepared to come home. And I  
16 knew he was not. However, the system took care  
17 of him.

18 DR. CARRIQUIRY: Yes. So, your son  
19 had the benefit of having a supportive family.  
20 This is one of the biggest facilitators to  
21 seeking and keeping mental healthcare among  
22 veterans.

1           There are a lot of veterans that do  
2       receive this type of support from their  
3       community, the service, or what have you. But  
4       the vast majority of them don't. I shouldn't  
5       say the vast majority of them. There's a  
6       sizeable proportion of veterans that fall  
7       through the cracks between DoD and VA.

8           So they become civilians and they  
9       don't know how to reenter, you know, how to get  
10      into the VA system. I think that's a big thing  
11      to address.

12           CHAIR LEINENKUGEL:     Alicia, real  
13      quick. And I'm going turn it over to Wayne.  
14      Just so I don't forget Wayne that's a -- I'm on  
15      Medicare now.

16           You talked about underperforming  
17      VAs. Is that data available for a who, when,  
18      where and why they were underperforming? You  
19      must have a list some place.

20           DR. CARRIQUYRY:   Yes. We don't have  
21      a list, but the VA does. So, one of the things  
22      that we did as a committee was, after each site

1 visit, we wrote a report. We didn't write a  
2 report that said this clinician is a disaster.  
3 We wrote a report that said, you know, we have  
4 found these issues in this facility and these  
5 things could be improved. And so on and so  
6 forth.

7 And so those reports, they were  
8 pretty short, three or four pages each, were  
9 submitted to VA by the contractor, not by us.  
10 Not by the Committee, but by Westat, who was  
11 the contractor that worked with the Committee.  
12 So they exist.

13 CHAIR LEINENKUGEL: My question is,  
14 I'm looking around at people that support us.  
15 Can we find access to that? We need to start  
16 building some quantitative data points here.

17 DR. CARRIQUIRY: So the people that  
18 you should contact, my staff, so, Laura and  
19 Abby. They would -- yeah.

20 (Off-microphone comments.)

21 CHAIR LEINENKUGEL: Okay. Last  
22 follow-up and then Wayne. What were the main

1 reasons that your group of individuals found  
2 that veterans said we're getting great mental  
3 healthcare or we're getting adequate mental  
4 healthcare? What were the main drivers? Was  
5 it the type of therapy? Was it the drug  
6 therapy? Was it the counseling?

7 DR. CARRIQUIRY: It was really  
8 interesting. They complained about the types  
9 of therapy. They complained about the access.  
10 They complained about many other things. Yet,  
11 they rated the VA care very highly.

12 I think it was a combination of they  
13 felt comfortable in this environment that was  
14 sort of familiar with them. They felt that the  
15 professionals who were frazzled and overworked  
16 were still caring and were very capable. They  
17 felt that the quality of the care they received  
18 was very high, even though they wanted more of  
19 it.

20 And so it was a combination. I  
21 think that it's a love/hate relationship I  
22 think that the veterans have with the VA.

1 CHAIR LEINENKUGEL: Yeah. That's  
2 fair enough.

3 DR. JONAS: I'll just add one more  
4 data access issue. And perhaps this is it.  
5 You know, we're going to be asked, and have  
6 been asked, to look at preferences and  
7 experiences in those areas. And I imagine you  
8 have some of that data. So, it might be good  
9 to actually see if we can get some of that  
10 information.

11 DR. CARRIQUIRY: Yes.

12 DR. JONAS: Because that may be a  
13 source. I'll just, you know, add onto that.  
14 Because that's not easy to get. And it sounds  
15 like you did a very thorough assessment of what  
16 was going on.

17 (Simultaneous speaking.)

18 DR. JONAS: So it would be really  
19 great to look at that. And I'll look through  
20 the report and if there are back reports that  
21 get into that.

22 I'm interested in if you looked at

1 the flip side of stigma. Which is the  
2 disability system.

3 DR. CARRIQUIRY: The what, sir?

4 DR. JONAS: Disability system.  
5 Because mental health disability is something  
6 that is available now. I see patients in the  
7 military. Mostly active duty. And many of  
8 them are getting ready to get out. And some of  
9 them have had a few years. Some of them have  
10 had, you know, they're getting up towards  
11 retirement age.

12 And so I have conversations with  
13 almost all of them about what their goals are,  
14 what their purpose is in coming and in getting  
15 therapy. And some of them, even though there's  
16 clear evidence-based approaches that could help  
17 them get better, don't have those goals,  
18 because they're about to get out and they want  
19 to make sure that their benefits are not  
20 impaired.

21 Can you talk a little bit about  
22 that?

1 DR. CARRIQUIRY: Oh, yeah. So that  
2 was another big reason for veterans maybe to  
3 come in the door, but then not continue with  
4 the treatment, because they didn't want to be  
5 cured. Because if they were cured, you know, or  
6 graduate, I don't know how you say this,  
7 because of the loss of benefits.

8 So many of them said, you know,  
9 sorry, I cannot continue coming, because if you  
10 say that I'm okay, I'm going to be losing this  
11 benefit, the other benefit, and the other  
12 benefit.

13 I don't know what the solution for  
14 that is, to be honest with you. But, yes,  
15 there was a very large number of veterans that  
16 said that. Yeah.

17 DR. JONAS: I guess the other thing,  
18 too, I would love to have some assessment of  
19 how to better organize. I think there are,  
20 what, 20,000 organizations in the country that  
21 are here to help veterans.

22 DR. CARRIQUIRY: Yeah.

1 DR. JONAS: How many? Fifty  
2 thousand?

3 DR. CARRIQUIRY: I have no idea.  
4 But --

5 (Off-microphone comments.)

6 DR. JONAS: Forty-five thousand.  
7 That's right Okay, sorry. There's a boatload.

8 DR. CARRIQUIRY: There's a boat load  
9 of them, yeah.

10 DR. JONAS: Forty-thousand coded.  
11 Coded, but nobody really knows. I mean, talk  
12 about sitting on a ham sandwich while we're  
13 starving. If we could somehow help manage that  
14 in a way that assured quality.

15 DR. CARRIQUIRY: Yeah.

16 DR. JONAS: They're in the  
17 communities. I mean, and this is community  
18 access. So you have a whole thing on, you  
19 know, how do we get community interface in  
20 those areas?

21 And I'm just wondering if there's some low-  
22 hanging fruit in that area. Is there a map of

1       how to do it so that these ICTs, once they get  
2       in and now are helping, can actually get that?

3               DR. CARRIQUIRY:   You know, I don't  
4       know if there's a map.   But if I was in charge  
5       of doing that, the first thing I would do is go  
6       to the Vet Centers.   People forget that the Vet  
7       Centers are part of the VA.   They think of the  
8       Vet Centers as something else.

9               The    Vet    Centers    are    the    most  
10       effective means to attract veterans to the VA.  
11       They    are    typically    staffed    by    veterans.  
12       Occasionally they have a clinician, but not  
13       always.    There's providers there that know how  
14       to direct the traffic and tell the veterans to  
15       go here or there.

16               And those are also people that know  
17       the lay of the land in their community.   So I  
18       think the Vet Centers is the nucleus.   This is  
19       the center from which you then can expand  
20       elsewhere.

21               MR.    ROSE:       I    think    just    another  
22       comment there.   Another comment, and that is, I

1 don't care if it's a substance abuse problem or  
2 if it's a mental health issue. And you look at  
3 the spectrum and how a person goes through  
4 that.

5 And you start out with the dark days. I mean,  
6 generally a lot of people may have to bottom  
7 out before they seek that help.

8 But the second critical step is  
9 acceptance of that problem before they go for  
10 treatment. And that, in many cases, is a  
11 difficult nut to crack. It really is. For  
12 whatever reason. Whether it be stigma, whether  
13 it be family, whether it be cultural.

14 But that's a huge piece. And I  
15 think it's very important. Because before you  
16 have that acceptance, you're not going to get  
17 the treatment. You're not going to go for  
18 coping. And you're not going to get on with  
19 your life. So I think we all have to be aware  
20 of that, too.

21 DR. CARRIQUIRY: That was one of the  
22 striking findings. Right? So, we screened

1 about 8,000 veterans using the usual screeners  
2 for substance abuse, PTSD, and depression, and  
3 all these other things. And among the ones  
4 that we screened and did appear -- this is not  
5 a diagnostic, obviously. It's just a screener.

6 But those that did appear to have a  
7 mental health thing, about half of them didn't  
8 even know it. And so, you know, that's about a  
9 million veterans if you expand out the numbers.

10 And that is a population that,  
11 you're absolutely correct, is going to be very  
12 difficult to reach because they are not seeking  
13 care.

14 CHAIR LEINENKUGEL: Anything else?

15 (No response.)

16 CHAIR LEINENKUGEL: Alicia, thank  
17 you so much for that. It was very helpful for  
18 us. And it gives us another perspective to  
19 work off of, and some more data points to  
20 collect. So thank you.

21 DR. CARRIQUIRY: Thank you so much.  
22 Good luck with your work. And if you need any

1 more information, you know where to find me.

2 CHAIR LEINENKUGEL: We will. Thank  
3 you very much.

4 (Applause.)

5 CHAIR LEINENKUGEL: With that,  
6 commissioners, I'd like to say that we got back  
7 on time. Thanks to, I think, Alicia. And no  
8 formalized bio-break.

9 (Laughter.)

10 CHAIR LEINENKUGEL: Also, this, in  
11 my opinion, wrapping up the day, this was a  
12 great day. This is an historic day from the  
13 seven of us in this U-shaped environment right  
14 now.

15 Our goal 18 months from now is to  
16 make historic recommendations for the  
17 improvement of veterans' mental healthcare  
18 throughout the VA.

19 And also, I think, a larger  
20 outcropping of that, seeing that this is now  
21 exposed on a national level, nationwide, with  
22 our general population, that once again, we'll

1 be taking the lead, and should be taking the  
2 lead, as far as making sure that at least our  
3 veteran subset of our general population is  
4 living up to the promise that various groups,  
5 including our whole health has put up on the  
6 screen today, that we have a commitment to our  
7 veterans.

8 And they also have a commitment  
9 back. And that is to, with the healthcare and  
10 the great clinical care that we provide them,  
11 that they get better. And we provide the tools  
12 for them to get better.

13 So, I'm just very proud to be part  
14 of this Commission. I thank you for being all  
15 in on day one. Day two is, again, going to be  
16 a very interesting day. We're going to have  
17 Fran present a lot tomorrow with the background  
18 that she has, and also give us a clearer  
19 direction. We're going to spend, then,  
20 the entire afternoon talking about our  
21 outcomes, how we're going to work together,  
22 what product we're going to actually produce,

432 of 1083

1       how we're going to get there and work as, what  
2       I call a team, rather than just a generalized  
3       commission.

4               So I thank you.   And one piece of  
5       administrative knowledge.   We have a great  
6       place for dinner tonight.   It's an historic  
7       place on a historic day.   Why not?   It's the  
8       Old Ebbitt Grill.   It's the oldest bar, pub,  
9       eatery, I think, in D.C.   And it's where a lot  
10      of legislation was either won or lost.   And in  
11      most cases it was won, I think, over a beer or  
12      a gin martini, depending on the era.

13              (Laughter.)

14              CHAIR LEINENKUGEL:   But it will be a  
15      great time there this evening, just to break  
16      bread with each of you and relax a little bit.  
17      And then we'll get on with day two tomorrow.

18              (Whereupon,       the       above-entitled  
19      matter went off the record at 4:51 p.m.)

## UNITED STATES DEPARTMENT OF VETERANS AFFAIRS

+ + + + +

CREATING OPTIONS FOR VETERANS'  
EXPEDITED RECOVERY (COVER) COMMISSION

+ + + + +

## CLOSED SESSION

+ + + + +

WEDNESDAY  
JULY 25, 2018

+ + + + +

The Commission met in the South American A/B Room of the Capital Hilton, 1001 16th Street, Washington, D.C., at 1:36 p.m., Jake Leinenkugel, Chair, presiding.

PRESENT

JAKE LEINENKUGEL, Chair; Senior White House  
Advisor, Veterans Administration  
THOMAS E. BEEMAN, Ph.D., Rear Admiral, U.S.  
Navy

(Ret), Co-Chair; Executive in Residence,  
The University of Pennsylvania Health  
System

COLONEL MATTHEW F. AMIDON, USMCR, Director,  
Military Service Initiative, George W.  
Bush Institute

WAYNE JONAS, M.D., Executive Director, Samueli  
Integrative Health Programs

JAMIL S. KHAN, U.S. Marine Corps (Ret)

SHIRA MAGUEN, Ph.D., Mental Health Director of  
the OEF/OIF Integrated Care Clinic, San  
Francisco VA Medical Center

JOHN M. ROSE, Captain, U.S. Navy (Ret), Board  
Member, National Alliance on Mental  
Illness

P-R-O-C-E-E-D-I-N-G-S

1:36

p.m.

CHAIR LEINENKUGEL: Did you need me to repeat all the gobbledygook that I said in the previous 60 seconds? So we're really going to discuss roles and responsibilities of all of us as a group. You just see what's laid out in the law and what the DFO has set up as far as operating principles for the Chairman and Co-Chairman. The DFO and certainly the ADFO can certainly see all of the work that they're responsible and accountable for and then the training that goes in for them even to be an assistant designated federal officer.

There's the alternate. Role and responsibility of commissioners, that's all of us. And I think that just getting to know all of you in the last 36 hours, there's not going to be an issue that I foresee or I think anybody here would foresee with this.

We are going to meet very few times

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS  
1323 RHODE ISLAND AVE., N.W.  
WASHINGTON, D.C. 20005-3701

438 of 1083

1 in 18 months, at least as scheduled. We may  
2 change that later today or by August.

3 Support staff. You've heard from  
4 the support staff, and I think there's going to  
5 be a lot of options that we haven't even  
6 thought about. But once we start doing the  
7 work, this is who we'll turn to through the DFO  
8 using chain of command and certainly have them  
9 get to the right parties.

10 Remember that there is budget, and  
11 we certainly had that available to us to use  
12 outside sources, to use consultants, to bring  
13 in subject matter experts that may have to pay  
14 for travel, etcetera, etcetera. So, I mean,  
15 it's not like we're running blind or naked  
16 here.

17 So there's going to be more than  
18 enough resources. And I think you've heard  
19 yesterday from the lead of VHA, Dr. Rich Stone,  
20 and you also heard from the acting secretary  
21 who spoke for the incoming Secretary Wilkie  
22 that this is a big deal, which it is, and that

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS  
1323 RHODE ISLAND AVE., N.W.  
WASHINGTON, D.C. 20005-3701

439 of 1083

1 it's going to be fully supported by the VA and  
2 the VA is responsible for the funding.

3 Oh, you've got to have one of these,  
4 right? That's why we're splitting right  
5 through it. Doesn't anybody want to go back  
6 and take a look at those? You can see the  
7 breakdown, just so you have some sort of idea  
8 of the flow of the Commission itself and some  
9 of the people behind the scenes, whether  
10 they're project analysts or contracting  
11 officers. This would be your go-to sheet, and  
12 what I would like, Sheila, is for, you know,  
13 this sheet would make sense for me to have at  
14 my desktop sometimes with telephone numbers,  
15 whether it's personal cell number and/or an  
16 email. So maybe that's an attached sheet to  
17 this one or right behind it.

18 I try to keep my paperwork -- I know  
19 it's in the binder. I try to keep my paperwork  
20 simple, so there's two sheets that I want: this  
21 and a contact sheet that I can put in my back  
22 pocket or in my suit jacket at all times.

1           This is where I want to stop and  
2           want everybody to have some input, if  
3           necessary. Again, I slept on this last night  
4           after a good meal, a couple of beers, some good  
5           conversation, and a full day. I think that  
6           we're going to be just fine with this, and  
7           there's nothing as far as things on here that  
8           you don't know either from personal practices,  
9           daily practices, who you are as individuals.  
10          But, you know, respect and fair treatment is  
11          just a good way to conduct ourselves daily in  
12          front of anybody, including our families, best  
13          friends, and even some people that we don't  
14          necessarily get along with but you still treat  
15          them with respect and dignity.

16               Objectivity.       Base decisions on  
17          factual analysis. I always have a question  
18          with that because I don't know the facts, and I  
19          brought that up day one. And sometimes facts  
20          are, there's just too much of the unknown that  
21          are facts cover-up, and I don't know if you  
22          know what I'm saying by this but there's things

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS  
1323 RHODE ISLAND AVE., N.W.  
WASHINGTON, D.C. 20005-3701

441 of 1083

1       that we don't know that we should ask questions  
2       about as commissioners and not get fully  
3       inundated with, well, this is the fact-based  
4       evidence reason why.

5               So I love to challenge things. I  
6       want you to challenge things. But at the same  
7       time, don't allow bias or a conflict of  
8       interest or any undue influence, and I don't  
9       see that happening with this group either.

10              Address differences of opinion and  
11       handle them constructively and professionally.  
12       We've already seen that, and we've done it with  
13       this group. So, I mean, good commissioners  
14       should not all agree. The consensus group,  
15       getting to consensus, we'll talk about that.

16              Transparency is the only way to go,  
17       and I think that there's been nothing but  
18       respect for every speaker, even amongst  
19       ourselves, with the attentiveness that I've  
20       noticed from this group.

21              Operating principles. So now it's  
22       really about engagement, and we've had this.

1       So reflect on each one of these for a minute.  
2       Consider and debate a variety of alternatives  
3       supported by the factual analysis. And, again,  
4       when it says factual analysis, I'll push back  
5       on some people sometimes. And I'm not talking  
6       untruths here, but I'm saying that, ladies  
7       behind me, don't get me wrong, yes, everything  
8       is based on facts and from Sigma Group facts  
9       always rule the day. But at the same time, we  
10      have to have some sort of gray area that we're  
11      always going to debate and discuss.

12               So that leads to the second bullet  
13      point:     contribute     to     debate     in     the  
14      identification of alternative recommendations.  
15      No one-on-one side meetings or conversations.  
16      Strive to meet the stated purpose and expected  
17      outcomes of the meeting and the Commission. I  
18      think that's our general charge.

19               Are there anything else from the  
20      good of the order of the commissioners that are  
21      missing up there? I didn't think so. Oh,  
22      there's one.

1 DR. BEEMAN: One thing on the first  
2 one, we have the commissioners, the staff, I  
3 might add "and guests" because we've had all  
4 friendly guests so far, but we might have  
5 somebody that disagrees with us and is bringing  
6 an alternate perspective, and I'm just thinking  
7 we might want to put "and guests" in number  
8 one. That one, where it says commissioners and  
9 support staff, I might put commissioners,  
10 support staff, and guests.

11 CHAIR LEINENKUGEL: So noted and a  
12 great point and a terrific addition. Agreed.  
13 Operating Procedures. Well, we're in the  
14 middle of the execution of the first one and  
15 how work will be conducted is really the  
16 biggest piece and the prize that we have to  
17 attack here before we leave this afternoon, and  
18 it's going to lead to decision-making and  
19 voting protocol at some point, so let's discuss  
20 those now, as well.

21 So the meeting agenda Sheila has put  
22 up well in advance, and I think everybody has

1       seen this and probably filled your calendars  
2       and looked for dates. The key here is that you  
3       have to be at least 60 days out, I believe.  
4       Sheila, is that correct?

5               MS. HICKMAN: About 90 days out for  
6       location.

7               CHAIR LEINENKUGEL: Ninety days out  
8       for location.

9               MS. HICKMAN: Thirty days out for  
10       Federal Register.

11              CHAIR LEINENKUGEL: Thirty days out  
12       for Federal Register. So there, you know, set  
13       dates that we have to be ahead of. And so  
14       right now, I would surmise that you are working  
15       on October, Sheila, you and your group. So the  
16       location needs to be determined by the  
17       Commission today; is that correct?

18              MS. HICKMAN: Yes it is.

19              CHAIR LEINENKUGEL: Okay. So let's  
20       think about that for a minute. I'm going to  
21       turn my mic off after I say let's try to come  
22       to a consensus. We'll see if we can get to the

1 next page on voting rights. Let's go there  
2 first. You've all seen this model. It's been  
3 in your handout. You've all lived it, you've  
4 all worked it before. Consensus is always the  
5 best way for any group to end up, and we need  
6 to always try to get consensus. As I told  
7 Sheila getting into this, there will probably  
8 be areas where we will not get to consensus,  
9 and we need to recognize that as commissioners  
10 and as a group and be comfortable with that.

11 So I will not give you my Jake  
12 Leinenkugel spiel on this. I want you all to  
13 chime in because this can play a big factor in  
14 how we go forward. Comments? Take a little  
15 bit to digest this.

16 COLONEL AMIDON: Having been on  
17 committee-based stuff before, we're always  
18 striving to achieve consensus, but just  
19 recognize that the majority rule will apply at  
20 certain times. And if you are not of the  
21 majority, perhaps you just state your objection  
22 for the record and move on.

1 CHAIR LEINENKUGEL: That's exactly  
2 it. I wish you were talking directly into the  
3 microphone. Were you able to get what Matt  
4 said for the record, even though it's your  
5 record? Thank you, thank you. Does everybody  
6 agree with what Matt, Commissioner Matt Amidon  
7 said? Anybody disagree?

8 (Off microphone comments.)

9 CHAIR LEINENKUGEL: Don't give us  
10 your minority opinion.

11 (Laughter.)

12 CHAIR LEINENKUGEL: Well, now it is  
13 important because there's going to be that  
14 time. And I think we all agree that the  
15 majority rule then will take place. Good.

16 Now, this is the work for the next  
17 however long it's going to take us, and that  
18 will be decided by all of us in here, but it's  
19 how we will conduct the work and assign the  
20 initial lead-in project breakdown based on tab,  
21 is it H of the COVER Commission? And everybody  
22 should have it memorized by now anyway. No,

1 I'm talking the COVER Commission. F? Thank  
2 you.

3 So prior to the start of this  
4 morning's open meeting, Tom Beeman and I spoke  
5 and I said my thinking at this time and, Tom,  
6 disagree or agree, but a quick way to at least  
7 establish a working protocol would be for you  
8 and I to take the five main performance and  
9 duties outcomes for the Comprehensive Addiction  
10 Recovery Act of 2016 and divide and conquer.

11 So Tom has agreed to be responsible  
12 for duties one, which is examine the efficacy  
13 of the evidence-based therapy model used by the  
14 secretary for treating mental health illnesses  
15 of Veterans and identify areas to improve well-  
16 based outcomes. Two is the lengthy one, but it  
17 involves the survey, so it's the whole list  
18 that we spent time on today with the survey and  
19 we know what issues are involved with that.  
20 And then three is examine the available  
21 research on complimentary and integration  
22 health treatment.

1 I originally took this, but I have  
2 some strong biases for some of these. And  
3 maybe that's not a bad thing, but I thought it  
4 just best at this point that Tom probably lead  
5 this process with a different perspective or  
6 without my bias at this point. So I took four  
7 and five.

8 And so what we would like to do is  
9 try to get some subgroups, and I'm calling them  
10 subgroups rather than subcommittees, and I  
11 think we need to get a clarification on  
12 terminology. So, again, let's think about this  
13 before we act, but a subcommittee, in my mind,  
14 is different than the members of this  
15 commission. Could I get a legal opinion on  
16 that?

17 The way I read it, and maybe I'm  
18 wrong, is that subcommittees can be assigned,  
19 we can bring people in, whether they're  
20 consultants, subject matter experts, advisors,  
21 world-renowned doctors, and assign them to a  
22 subcommittee to do a component of work outside

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS  
1323 RHODE ISLAND AVE., N.W.  
WASHINGTON, D.C. 20005-3701

449 of 1083

1 of the commissioners. And then they would take  
2 that work back and present it either to a  
3 subgroup of the Commission or to the entire  
4 Commission. That's the way I interpreted that.

5 MS. HICKMAN: And you're exactly  
6 right. So it's a pulling together of experts  
7 that become a subcommittee. So if you're  
8 working on surveys, then you would pull  
9 together some experts from around, wherever  
10 those experts would come from. We would not be  
11 able to pay them; just know that. But all they  
12 would do is completely work on that subject,  
13 and then they would report out to the group.  
14 They don't report out to anyone. They can't  
15 talk to Congress, they can't say what their  
16 recommendations are. They can't make decisions  
17 or votes like that, but they can present their  
18 recommendations to the group and the group can  
19 make decisions based on those recommendations.

20 CHAIR LEINENKUGEL: One of the few  
21 times that I was right when I interpreted  
22 something that I read out of this binder. So

1       that's correct.

2                   MS. HICKMAN:       And we can have  
3       several.

4                   CHAIR LEINENKUGEL:   Right.    There  
5       can be multiple subcommittees.   So just for the  
6       sake of not confusing ourselves, let's call our  
7       group workgroups, commissioner workgroup, and  
8       all of the other sub stuff that we have or  
9       bring in will be outside.   Does that make it  
10      easier for everybody to understand it?   So if  
11      there is going to be a subcommittee to the  
12      Commission, it can certainly be called, I would  
13      think, by either myself or at least Tom at this  
14      point, and if you have recommendations, we want  
15      the other commissioner recommendations of a  
16      particular type of people on it, there might be  
17      some individual, knowing people have resources  
18      that you have contacts with, and that's what  
19      we, as commissioners, should bring --

20                   MS. HICKMAN:    Sir, if I might say  
21      something.   If we're going to split into those  
22      three or those six areas, five areas, it would

1 be better if we were to get any individuals  
2 that are on those groups and put it in writing  
3 and get it so that we can tell the secretary  
4 up-front we broke down into these  
5 subcommittees, even internal to the group here,  
6 and that way it --

7 CHAIR LEINENKUGEL: Workgroups.

8 MS. HICKMAN: And workgroups within  
9 the body of the letter, yes. But --

10 CHAIR LEINENKUGEL: For what --

11 MS. HICKMAN: It covers us because  
12 we're a Presidential Commission, everything  
13 that we do is subject to audit. So if we step  
14 outside of FACA rules and start using our own  
15 terminology or anything like that, then we  
16 could be suspect under the FACA rules. So  
17 everything --

18 CHAIR LEINENKUGEL: This is a good  
19 time to be going through this discussion. What  
20 is outside the FACA that I just --

21 MS. HICKMAN: So if we set the  
22 terminology as workgroups, there aren't

1       workgroups, there are subcommittee rules. And  
2       really all it does is protect us to have that  
3       in writing that says Jake and Wayne and Matt  
4       are a subcommittee that are looking at these  
5       three areas. It's protection for us to be so  
6       that, if we are audited, then that comes out  
7       and it says, no, we established it up-front  
8       that this group was responsible for these three  
9       areas.

10               CHAIR LEINENKUGEL:     Okay.     We're  
11       playing by the rules, so we will work within,  
12       everybody that will be assigned -- I still need  
13       clarification because now you're confusing me,  
14       again back to FACA. If you want me to call it,  
15       because of FACA rules, subcommittee, we will  
16       call it a subcommittee to meet the FACA rules.

17               MS. HICKMAN:   That would be awesome.

18               CHAIR LEINENKUGEL:     We are not  
19       really subcommittees.

20               COLONEL AMIDON:   Verified down to  
21       the very functional level, subcommittee  
22       describes the functional work that supports a

1 committee. We've been delineated as such,  
2 we're doing it according to five work streams  
3 currently. A subcommittee could comprise  
4 external members and/or --

5 MS. HICKMAN: Oh, absolutely,  
6 absolutely.

7 COLONEL AMIDON: -- just standing  
8 committee --

9 MS. HICKMAN: Yes, yes.

10 CHAIR LEINENKUGEL: So if you, as a  
11 subcommittee, are working on the first one that  
12 Tom has or say you're going to work on a survey  
13 and it's you and Jamil, you could bring in  
14 whoever, unpaid, that you want to bring in as  
15 long as it's agreed to.

16 So everything that we do in  
17 formulating, according to Sheila now, in order  
18 to meet the FACA rules, with a subcommittee we  
19 should have the list of names and then any  
20 outsiders that we bring in that are dubbed a  
21 subcommittee, they should be presented to you  
22 prior to them being approved to sit on a

1 subcommittee. Who makes that final approval?

2 MS. HICKMAN: So you can make the  
3 decision on whatever your SMEs are that you  
4 want within a subcommittee, as long as, you  
5 know, they're not paid, so any of that. But  
6 then all I need to know is who those  
7 individuals are, basically a little bit about  
8 where they're located and everything like that,  
9 so I can put another memo together that says  
10 we've established a subcommittee that is  
11 completely looking at cannabis oil, period,  
12 and, you know, it would cover it.

13 What I don't want to have happen is  
14 at any time during this 18 months or after it  
15 GAO comes down and says you did something  
16 illegal, and everything is thrown out the door.  
17 So I would prefer to cover us in every respect  
18 that we can.

19 COLONEL AMIDON: So if we came up  
20 with an aggregate list of external candidates,  
21 independent of which subcommittee they're part  
22 of, do we need a census vote to approve to

1 outreach to all of them and then you do the  
2 outreach?

3 MS. HICKMAN: No. So if you decide  
4 who you want on your committee, Jake then is  
5 who you need to let know and me, of course. I  
6 mean --

7 COLONEL AMIDON: But we have the  
8 latitude to --

9 MS. HICKMAN: Yes, we're linked at  
10 the hip.

11 COLONEL AMIDON: And we're free to  
12 do outreach --

13 MS. HICKMAN: You can do outreach.

14 COLONEL AMIDON: -- clarity of the  
15 message --

16 MS. HICKMAN: So there's no --  
17 subcommittees don't travel, so if you set a  
18 subcommittee up you travel to them. They meet  
19 at whatever location, but we're not paid travel  
20 or anything like that.

21 COLONEL AMIDON: Do you have a  
22 framework so that, you know, is this --

1 MS. HICKMAN: I can completely --

2 COLONEL AMIDON: Since it's endorsed  
3 by you, that would make --

4 MS. HICKMAN: Yes, yes.

5 DR. BEEMAN: Here's a thought that  
6 I've been thinking about, particularly since I  
7 got assigned number three, as well. What we  
8 forgot to say is I agreed when he said one and  
9 two, and then I was assigned by Jake number  
10 three.

11 Here's what I was thinking. I was  
12 thinking that the subcommittee should consist  
13 of, at least the subcommittee that I've been  
14 assigned, at least the two clinical people on  
15 the group but publish the time and date of the  
16 call so that any member of the Commission that  
17 wanted to listen in could so that there's  
18 transparency. And then --

19 MS. HICKMAN: That we'd need to get  
20 back with you on.

21 DR. BEEMAN: Okay. The second piece  
22 was that we have, what, a DFO and a permanent

1 member of the team would be either Dr. Murphy  
2 or her designee. And that would be it, I mean  
3 as far as the official subcommittee folks.

4 The second part would be that the  
5 SMEs would actually be invited to provide  
6 information, input, but wouldn't be constituted  
7 as a member of the subcommittee. That's kind  
8 of what I was thinking because it keeps it  
9 neater and cleaner. But I did want to see if I  
10 could have, like if this was something Jack  
11 would like to listen in but he wasn't on the  
12 committee, to publish that because why not be  
13 transparent to the members of the Commission?

14 MS. HICKMAN: Well, subcommittees  
15 report out to the Commission, but if we're  
16 going to start all in to listen to what's going  
17 on, then we start forming a quorum and a  
18 meeting. So we just have to be very careful  
19 about that. So if you --

20 DR. BEEMAN: Listen but not too  
21 hard, is that --

22 MS. HICKMAN: If you own number

1 three, then certainly we would be listening in  
2 on that because you're already on record as  
3 being the owner of that and this is your  
4 subcommittee or sub-subcommittee. So then you  
5 would be on record about it. But I don't want  
6 then that expanded to say, hey, Jack, you know,  
7 Shira, you guys want to call in and listen to  
8 this because, all of a sudden, we're forming a  
9 meeting and we have not gone on record as a  
10 meeting.

11 DR. BEEMAN: This is the simple made  
12 difficult.

13 MS. HICKMAN: But there will be,  
14 there will be, whenever you travel or whenever  
15 a subcommittee or anything, there is an AFO or  
16 a DFO that will be present for that. So, like,  
17 if you were going out to meet with your  
18 subcommittee and you needed to travel to that  
19 location, you know, Alison or Stacey or Kris,  
20 probably not Laura because she's going to have  
21 surgery on her feet so we're not going to make  
22 her travel, but you would have, you would have

1       one of us available. And the reason is is  
2       because their job is to still protect you from  
3       all other FACA rules, too.

4               DR. BEEMAN: But you don't have to  
5       travel to a spot. You can do it by phone?

6               MS. HICKMAN: Yes, with an ADFO or  
7       DFO on the phone.

8               (Laughter.)

9               CHAIR LEINENKUGEL: Jack, did you  
10      have something?

11              MR. ROSE: Yes. On these experts  
12      who call in, how much lead time will Sheila  
13      need before you know who we'd like to come in?  
14      How much lead time for an expert to come in and  
15      let you know?

16              MS. HICKMAN: To a subcommittee or -  
17      -

18              MR. ROSE: Yeah. To a subcommittee.

19              MS. HICKMAN: I mean, if you're  
20      forming your subcommittee, then tell me how  
21      many individuals you're pulling on to it  
22      because you're not going to start your

1       subcommittee until you've determined who your  
2       committee members are.

3               MS. DICKSON:    But the SME may just  
4       be more time given, you know, more time --

5               MS. HICKMAN:   Just in one time, then  
6       just let us know.

7               MR. ROSE:    Okay.

8               MS. HICKMAN:   An ADFO or DFO is  
9       present at everything, and then every decision  
10      that's made, not decisions but everybody that  
11      comes on, you know --

12              MS. DICKSON:    And we don't do  
13      transcriptions of those meetings, but we do  
14      need minutes done.   So someone would be there  
15      to support you and taking minutes, as well.

16              MS. HICKMAN:   And I know we added  
17      that in and we can provide that.   It won't be  
18      the young lady that's sitting here today, but  
19      it will be somebody who sits in and takes  
20      minutes for that.

21                               (PHONE RINGING.)

22              MS. HICKMAN:   Where is that?   It

1 will be -- a transcriptionist basically will  
2 call in to those types of meetings so that they  
3 can take the minutes.

4 CHAIR LEINENKUGEL: So there's a  
5 reason why subcommittees was put up on this  
6 chart to begin with, and that's why they're  
7 saying subcommittees. So does everybody have a  
8 better understanding as to what is going to be  
9 required of us? Certainly from utilizing the  
10 DFO or the ADFO to be available for each one of  
11 those meetings, even if it is a call.

12 MS. HICKMAN: And, Jake, what I can  
13 do is go back and we can put together, you  
14 know, some scenarios and kind of lay it out a  
15 little cleaner and provide that to everyone so  
16 that they know, I'm doing this, this, this is  
17 what I need, and that way --

18 CHAIR LEINENKUGEL: I think a one  
19 pager should do it.

20 MS. HICKMAN: Yeah.

21 CHAIR LEINENKUGEL: Just with the  
22 main bullet points. We get it.

1 MS. HICKMAN: Okay.

2 CHAIR LEINENKUGEL: Until someone  
3 trips up and forgets to call the DFO or ADFO.

4 MS. HICKMAN: And call us for any of  
5 that stuff. I mean, seriously, we want to make  
6 sure that --

7 CHAIR LEINENKUGEL: Let's stay on  
8 that same subject. So a personal call from,  
9 say, myself and say it's Tom just to coordinate  
10 things, I hope we don't need a DFO or an ADFO  
11 during that call.

12 MS. HICKMAN: No, it's only for you  
13 coordinate something that's going to happen at  
14 the next meeting or something like that or if  
15 you have a question. But no.

16 CHAIR LEINENKUGEL: Okay. And what  
17 if I have a recommendation for how or who I  
18 want to bring in to this subcommittee, even  
19 though I'm not a part of it?

20 MS. HICKMAN: If you're making any  
21 sort of decision, then a DFO must be present.

22 CHAIR LEINENKUGEL: Okay. Well, I'm

1 not making a decision, I'm making a  
2 recommendation.

3 (Simultaneous speaking.)

4 CHAIR LEINENKUGEL: So my point is,  
5 though, is though, that if that did happen he  
6 would have to contact you if he made a decision  
7 based on --

8 MS. HICKMAN: If that phone call was  
9 held, just one of us on the phone call. But no  
10 decision should be made outside of this group  
11 that have anything to do with the scope and  
12 focus of this group.

13 MR. ROSE: Wait a minute. If you're  
14 trying to do number one and you get your  
15 subcommittee and you come up with  
16 recommendations, that all has to go back?

17 MS. HICKMAN: The recommendations  
18 come to the group.

19 MR. ROSE: Come to the group.

20 MS. HICKMAN: Yes, yes.

21 MR. ROSE: Okay.

22 CHAIR LEINENKUGEL: That's good to

1 know.

2 DR. BEEMAN: A thought. I was  
3 hoping that what would happen is that, once the  
4 two groups are designated, that I could say I'd  
5 like to have a phone call with a call-in number  
6 set up before our next Commission meeting, and  
7 then what would happen is you would be able to  
8 assign the DFO and see if Dr. Murphy or  
9 whoever, a member of her team, would be  
10 available for that call, if that's appropriate  
11 to those three issues, that we would have the  
12 call and then at the next meeting of the  
13 Commission in August we would report out, and  
14 that would be a great time then for you and I  
15 to discuss publicly, like, your recommendations  
16 on who to have appointed because then we have  
17 the DFO and everything like that.

18 MS. HICKMAN: And your both  
19 subcommittees. So as you just described, your  
20 team is a subcommittee. They're going to have  
21 to go in writing as a subcommittee and you are  
22 coming up with recommendations and then, yes,

1       you would bring it back and report it out.

2               DR. BEEMAN:   And that would be the  
3       best time then, I was thinking in August, if we  
4       already had a meeting and then we were informed  
5       by Dr. Murphy's team, we could come back then  
6       in August with some recommendations that, you  
7       know, we thought about the questionnaire and we  
8       think it should be, you know, just a small  
9       targeted qualitative questionnaire, so that  
10      this group could say, yes, we agree with that  
11      or not. Does that make sense?

12             MS. HICKMAN:   It wouldn't be, it  
13      wouldn't be just does this group agree. It is  
14      --

15             DR. BEEMAN:   No, I'm saying that, in  
16      August, it would be the entire Commission,  
17      because we would be able to report out what we  
18      came up with in our meeting that was held  
19      before the Commission meeting.

20             MS. HICKMAN:   Yes, you would report  
21      out as that subcommittee and then, as a whole,  
22      you would still vote to say this is a decision

1       that we're --

2                   DR. BEEMAN:   Okay.   Thanks.

3                   CHAIR LEINENKUGEL:   And a cautionary  
4       note, even though I like us getting into this  
5       situation, is that you're going to hear some  
6       things from folks that are coming in in August  
7       that are going to probably be relevant to your  
8       subcommittee.   So by me getting out in front of  
9       it,   you   may   have   a   subcommittee   phone  
10      conversation with recommendations and then you  
11      may hear something in August, say from Lynda  
12      Davis or the Veteran experience officer and go,  
13      oh, I did not know we had those capabilities or  
14      those resources or those survey type of  
15      mechanisms.   So I'm just trying to coach you  
16      we, at some point, have to bring in VSOs in the  
17      mix. And there's not just the big four or the  
18      big six as they're called.   There's actually 35  
19      groups, and they all get a vote for Veterans  
20      Day and Veterans Month and they're all here  
21      during Veterans Day and Veterans Month.   That's  
22      the only time you see a lot of these groups,

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS

467 of 1083

1 and there's a lot of very active planning  
2 groups that Matt works with, and has worked  
3 with for some time now that probably have some  
4 resources, as well.

5 I'm just saying that I like our  
6 energy going forward prior to the August  
7 meeting. I'm not saying stop. I'm just saying  
8 that August may lend some more clarity to fill  
9 in a couple of gaps for the working group to  
10 work on.

11 MR. ROSE: On that, we can't do  
12 anything until we meet anyhow, right? I mean,  
13 he could come forth, that group, with a  
14 recommendation, but we wouldn't act on it until  
15 we met, right?

16 CHAIR LEINENKUGEL: That's correct,  
17 that's correct.

18 MS. HICKMAN: But the sooner I get  
19 the subcommittee uses on record the better.  
20 So, I mean, if you know how you're going to  
21 break out within the next couple of days, let  
22 me know. I'll prepare that memo and get it up

1 for the secretary's signature. And really all  
2 it does is it warns him that there are  
3 subgroups that are looking at this and they  
4 will be calling in SMEs basically and getting  
5 some advice. But the permanent subcommittee  
6 members, I do need them on there, too.

7 CHAIR LEINENKUGEL: It's been very  
8 helpful, at least from the subcommittees --

9 MS. ENIGLES: I think it will  
10 clarify the commissioner meeting. I just  
11 wanted to tell -- the way the Commission on  
12 Care operated is we set up subcommittees, we  
13 had a couple of commissioners on each  
14 committee, also had VA and support staff  
15 supporting those committees. Then those  
16 committees had a conference call every week  
17 that the staff set up. You know, the head of  
18 the committee set up the agenda, and they would  
19 call in and they said, you know, we really need  
20 to talk to Tracy Gaudet about, you know,  
21 something related to home health, attend that  
22 call, and then that subcommittee would pull

1 together all the information they learned, you  
2 know, between the previous meeting and then the  
3 next meeting and then they would present out  
4 this is what we've done since the last meeting,  
5 if they have any recommendations at this point,  
6 these are recommendations, we'll put it to the  
7 full Commission, and then the full Commission  
8 would make a decision about going forward.

9 MR. ROSE: Okay. That's good.

10 CHAIR LEINENKUGEL: How many  
11 commissioners were on that again?

12 MS. ENIGLES: Fifteen. A much  
13 larger group.

14 DR. KHAN: So if I may ask a simple  
15 question. If I'm conducting patient-centered  
16 networks, at least I can do it two networks  
17 during that 30 days because each network, they  
18 have their own it's always done. That  
19 information would be available to us. Whatever  
20 is not available, I'm thinking of the 30-day  
21 time frame, you know. If we can achieve  
22 something during the 30 days and still prepare,

1       you know, what more is given to us.

2               CHAIR LEINENKUGEL:   We're missing a  
3       person, as you know, right now who's not at  
4       this meeting.   I forgot what title, Sheila,  
5       we're going to have Casin.

6               MS. HICKMAN:   Chief Advisor.

7               CHAIR LEINENKUGEL:   Chief Advisor.  
8       Casin Spiro who I think the world of, I think I  
9       talked to some of you about Casin, and maybe  
10      some of you have interacted with Casin.   Casin  
11      will go through any barrier, any wall, any  
12      hurdle in a very short amount of time and get  
13      to the answer.   So he would be the person that  
14      I see working directly with Sheila and myself  
15      to get through any issues that you may have  
16      with subcommittees or any of your personal  
17      ideas or approaches or questions.   I call him  
18      Radar, if you remember M\*A\*S\*H, and he's a 30-  
19      year-old that's going on 50.   I thought he was  
20      going to be here today, but I know there's just  
21      way too much going on over at the VA.   But know  
22      when he gets in here by the August meeting and

1 he'll be working with Sheila probably starting  
2 in the next couple of weeks, but he will at  
3 least transition in the next 30 to 60 days.

4 MS. HICKMAN: Thirty to 60 days, the  
5 only difference is that Casin can't touch FACA  
6 in his role, so anything that's FACA related  
7 has to come through here. Anything that --  
8 like, Casin will help put together, like, SMEs,  
9 knowledgeable people that he is aware of  
10 throughout the community that he works with,  
11 and that's where he has a strength that he can  
12 bring in some of those additional people.  
13 Wouldn't you say that's right, Jake?

14 CHAIR LEINENKUGEL: I would. And I  
15 would also add that he will be able to work  
16 directly with the Chief of Staff of VHA, Larry  
17 Connell, who was just named Monday, working  
18 directly for Dr. Stone. So Dr. Stone you all  
19 met. Again, he will uphold everything that we  
20 want to do based on, I think, the incoming  
21 secretary once you've heard from the acting  
22 secretary today. So from that end, I think

1       you're going to see a sense of urgency, plus a  
2       sense to cut through what I call the layers to  
3       get better action.

4               So let me give you an example with  
5       the VISNs and everything you saw. Casin will  
6       be able to go much faster than anybody else in  
7       VHA if I were to call them in my previous role.  
8       He'll probably have the answer in the same day  
9       where I can tell you the way the old VHA  
10      worked, it would be three to five business days  
11      or you would be completely ignored. It's just  
12      the way the place operated. Sorry about that,  
13      Doctor, but that's VACO. VACO siloed VHA.

14             MS. HICKMAN: It is VACO.

15             CHAIR LEINENEKUGEL: Correct?

16             MS. HICKMAN: Yes.

17             CHAIR LEINENEKUGEL: So that will  
18      change. That will take a 60-day period, and a  
19      lot of people are going to be nervous,  
20      rightfully so. There will be a huge sense of  
21      urgency to respond immediately back to cut  
22      through the layers.

1           So when you're talking about VISNs  
2     and getting to medical center directors, I  
3     think we're going to see immediate responses if  
4     we want to do site visits, if we want subject  
5     matter experts, if we need additional  
6     clinicians. Your counterparts, you know, many  
7     of them were in front of us the last day and a  
8     half. But they're wonderful people, and I  
9     think they're waiting to contribute.

10           So I'm excited because Casin is the  
11     Radar-type person that will hopefully navigate  
12     a lot of that while Sheila working along with  
13     the other AFDOs to make sure that we're playing  
14     by the FACA rules, right? Casin doesn't have  
15     to worry about so much. He just goes out and  
16     gets this stuff that we need to get done or  
17     bring the people in or bring the groups in.  
18     For instance, VSOs. He'll probably work  
19     directly with our VSO Rep, Jason Beardsley, and  
20     work with the White House Rep, Jennifer Korn,  
21     and activate what we need from key VSOs all  
22     within 24 hours.

[www.nealrgross.com](http://www.nealrgross.com)

1 MS. HICKMAN: And bring you a key  
2 speaker in that has subject matter experts, you  
3 know, for the committee or not the committee  
4 but the subcommittee meetings.

5 CHAIR LEINENKUGEL: So thanks for  
6 bringing that up because I forgot about Casin  
7 for a minute, but he's going to be a huge asset  
8 and resource that we can lean on a little bit.  
9 So I wish he was here right now. So both of us  
10 are a little apprehensive of how to break up  
11 the work right now.

12 DR. BEEMAN: Yes, that's why I have  
13 this sense of urgency about having a phone call  
14 before, even if it's just to tee it up with the  
15 committee.

16 CHAIR LEINENKUGEL: And I want you  
17 to do that. I think you should. I think the  
18 more that we interact together, even if it's  
19 not to the last step, okay? So what you're  
20 doing is you're going through one, two, three,  
21 and four, but getting to four subcommittees,  
22 develop recommendations, and present to the

1 core Commission. You may just bring back three  
2 recommendations or you may bring back six  
3 recommendations, and then we get to the last  
4 one at the August meeting. At the open  
5 meeting, we deliberate, modify, and develop  
6 alternate recommendations or accept your  
7 recommendations. Right? I'm looking for a  
8 consensus.

9 MS. DICKSON: I mean it may take  
10 more than one phone call to come up with a  
11 recommendation. It may take a phone call every  
12 week, you know. Give you time to think through  
13 it, talk through it, figure out what direction  
14 you want to take, and then come up with some  
15 recommendations. However many phone calls you  
16 need during that time, we can set them up.

17 MS. HICKMAN: You two can talk  
18 anytime. It's not, I mean, really it's just,  
19 you know, because you're the Chair and Co-  
20 Chair, you're not going to make decisions. But  
21 if you want to call Jake and say, ugh I can't  
22 deal with that you're taking --

1 (Laughter.)

2 CHAIR LEINENKUGEL: Take three back.

3 (Laughter.)

4 DR. BEEMAN: One of the things, I  
5 think, Jake, that would be helpful for me would  
6 be I would like, for sure, to have the two  
7 clinical people and then anybody else who would  
8 like to serve for those first three. But as I  
9 looked at them, I felt that one, two, and  
10 three, particularly with a list of things,  
11 required somebody with some clinical knowledge.  
12 And regrettably for them, they're the two that  
13 have the clinical knowledge. But if there's  
14 somebody else that says, yes, but I'm  
15 interested in that, that's great. But I'm  
16 afraid that if you and I met about this, it  
17 would be interesting but we wouldn't have --

18 CHAIR LEINENKUGEL: And as I said to  
19 you early on, I would definitely choose the two  
20 that you have on this commission --

21 DR. BEEMAN: Sure. And then if  
22 somebody else --

1 CHAIR LEINENKUGEL: -- and then I  
2 would probably say to Tracy Gaudet, either  
3 Tracy herself or somebody in Tracy's group. I  
4 mean talk about the people, and one of them  
5 happens to be an ADFO.

6 MS. HICKMAN: And I was just going  
7 to say you're in her area, and Alison is an  
8 ADFO, we put her as part of the --

9 DR. BEEMAN: Kind of both.

10 MS. HICKMAN: -- and she's the ADFO  
11 to that respective committee.

12 DR. BEEMAN: Sure.

13 MS. WHITEHEAD: And if there's a  
14 need for additional, you know, some work in my  
15 office, whether that's Tracy or -- we have  
16 additional SMEs.

17 DR. BEEMAN: Sounds good.

18 MS. HICKMAN: Yeah, that becomes  
19 very easy. But, yes, and then we just we got  
20 to take notes.

21 DR. BEEMAN: I'm in. You know, I  
22 have your email, so I'm going to have to send

1       it to you, Sheila, to help, you know, get  
2       people's phone numbers and all that kind of  
3       stuff.

4               MS. HICKMAN: Absolutely.

5               CHAIR LEINENKUGEL: Let's discuss  
6       emails. What are the FACA rules with emails?

7               MS. HICKMAN: I have not seen any  
8       FACA rules on emails, but don't make any  
9       decisions on email.

10              DR. BEEMAN: Well, you can have a  
11       decision to have a committee meeting, right?

12              MS. HICKMAN: If it's a meeting and  
13       we have informally announced a meeting, it has  
14       to be open and then we can't make those  
15       decisions on a phone call.

16              DR. BEEMAN: But subcommittee  
17       meetings don't have to be open?

18              MS. HICKMAN: Subcommittees are not  
19       subject to that. They're subject to minutes  
20       because of the presidential and an ADFO.

21              DR. BEEMAN: Okay.

22              CHAIR LEINENKUGEL: So are emails on

1 a government server dealing with this  
2 commission FOIA?

3 MS. HICKMAN: Yes.

4 CHAIR LEINENKUGEL: And are emails  
5 on personal laptops or personal iPads FOIA?

6 MS. HICKMAN: I've never seen them  
7 go after a personal. I think they can tell you  
8 that they want to look at your personal, but  
9 you don't have to. A statement from OIG is  
10 that they do come after your personal, but you  
11 don't have to oblige them, you just have to  
12 tell them I don't have anything. Now, I would  
13 hope you don't. But, yes, everything that's in  
14 writing, every email I sent out to all of you  
15 guys to give you updates on everything, all of  
16 that is FOIA-able and auditable.

17 CHAIR LEINENKUGEL: Is it allowable  
18 for email then to be another avenue as far as  
19 working with a subcommittee rather than or in  
20 addition to telephonically? So in other words,  
21 you just finished a telephonic meeting and you  
22 just came up with another good idea and

1 thought. Can you go back to the subcommittee  
2 with an email and say, hey, here's another idea  
3 that I have?

4 MS. HICKMAN: Yes, because that's  
5 your subcommittee, yes. The ADFO or the DFO is  
6 always on any meeting. Always.

7 CHAIR LEINENKUGEL: Tom, did you get  
8 that?

9 DR. BEEMAN: I did not.

10 CHAIR LEINENKUGEL: Yes, I missed  
11 that, too. Wayne asked the question do you  
12 have to go back to the DFO or ADFO an email  
13 recommendation that you made or somebody made  
14 back to you after, say, a telephonic or not  
15 even after a telephonic, but it involves a  
16 recommendation to the subcommittee meeting or  
17 subcommittee input, and Sheila just said that  
18 the DFO or ADFO should be copied on that  
19 recommendations.

20 DR. BEEMAN: That's what I was going  
21 to say, why don't we just have them permanently  
22 copied on things so that way you'll know and

1       you're in the loop and --

2                   CHAIR LEINENKUGEL:     So can you put  
3       that down on that one-pager that I asked for?  
4       So there's a couple of one-pagers.  There's the  
5       contact list of all of us with personal email,  
6       if that will work for everybody, and/or a work  
7       email if you want to use your VA, and then I  
8       would say the personal cell phone.

9                   DR. BEEMAN:     Could have used that  
10      last night.

11                   (Simultaneous speaking.)

12                   CHAIR LEINENKUGEL:     So keep it  
13      simple.

14                   MS. HICKMAN:   We got it.

15                   CHAIR LEINENKUGEL:     Then the one-  
16      pager on rules that we just discussed.  That  
17      would be very helpful as a reminder for each  
18      one of the subcommittees.  So with that said, I  
19      think we're off of this page.

20                   Decision-making,   voting   protocol.  
21      Okay.  Let's spend some time here.  The Chair  
22      and DFO are encouraged to generate a robust

1 discussion -- why I'm reading this is because,  
2 believe it or not, I haven't read this page yet  
3 -- a robust discussion about the matter at  
4 issue before any voting takes place. Well,  
5 done, absolutely. That's a given.

6 The Chair or DFO should solicit the  
7 views of all commissioners so that any comment,  
8 insight, or concern that could influence a  
9 commissioner's conclusion on the matter at  
10 issue is heard and considered before a vote  
11 related to that. That's just good protocol.  
12 That's standard procedure.

13 When presenting a question for a  
14 vote, the Chair or DFO should solicit and  
15 answer a question about its meaning before the  
16 vote begins. I think from what I've witnessed  
17 here at this group, we're going to ask every  
18 question before anything comes to a vote.

19 Voting should be done  
20 simultaneously. The objective is to avoid any  
21 potential order bias associated with sequential  
22 -- oh geez who wrote this a lawyer?

1 (Laughter.)

2 CHAIR LEINENKUGEL: Voting should be  
3 done simultaneously. The objective is to avoid  
4 any potential order biases associated with  
5 sequential voting, and thereby enhance the  
6 integrity and meaning of the voting results.  
7 Interpret that for us.

8 MS. ENGILES: You want me to say  
9 what that means? You don't have, you know, if  
10 you're voting on something and then maybe  
11 there's not a couple of commissioners present,  
12 so then the next day they hand in their vote.  
13 Whoever is here, as long as we have a quorum,  
14 those are the people who vote. Whatever their  
15 decision is, it's good. We don't have, like, a  
16 follow-up vote on that. I pulled that from the  
17 lawyerspeak and I should have simplified.

18 (Simultaneous speaking.)

19 DR. JONAS: Tom, Shira, and Jake,  
20 you all said yes --

21 MS. DICKSON: Yes, you're holding  
22 back on your vote to wait to see what somebody

1 else does first. That's what it means to do,  
2 you know. Everybody make their own decision  
3 and not do that just because Shira said yes.

4 (Simultaneous speaking.)

5 CHAIR LEINENKUGEL: Okay. That's as  
6 clear as mud.

7 (Simultaneous speaking.)

8 MR. ROSE: As far as protocol, how  
9 do you do it? I mean, is there a motion to  
10 approve this, a second, and then any discussion  
11 --

12 CHAIR LEINENKUGEL: That's exactly  
13 what I will do, yes. There will always be a  
14 motion that should be brought up, and there  
15 should also be approval and seconded, and then  
16 there should be discussion. The names of the  
17 committee members and their respective votes  
18 should be read aloud, otherwise it will be hard  
19 to vote, yes, absolutely.

20 The question put to the vote should  
21 not be the subject of further discussion or  
22 clarification while the voting is underway.

1 Yes, understood.

2 Briefing materials provided to  
3 commissioners as background materials before a  
4 meeting should be thorough and, to the extent  
5 possible, include the questions that will be  
6 voted upon. Yes. The objective is to maximize  
7 the meeting and utility of the voting results  
8 by ensuring that the commissioners have had  
9 ample opportunity to study background materials  
10 before the day of the meeting. Yes.

11 DR. JONAS: What does before mean?

12 CHAIR LEINENKUGEL: It could be the  
13 day before.

14 DR. JONAS: The day before. Okay.

15 (Simultaneous speaking.)

16 CHAIR LEINENKUGEL: Again, I think  
17 it's good to go over this because it's going to  
18 be happening, and then we have the DFO and the  
19 group behind us to make sure that all the rules  
20 are being abided by, either by the rules of the  
21 FACA and it could also be by the rules of good  
22 protocol and order.

1           We're not quite to this page yet  
2           because we're going to leave that one there as  
3           an incentive. It's an incentive so that we get  
4           down to what Tom and I need to discuss with all  
5           of you, and I think Tom has already started it,  
6           at least with Shira and with Wayne. We want to  
7           go back to Tab F.

8           Tom, do you want to start? I don't  
9           think we -- yeah, I would just like you to  
10          start and then let's discuss this.

11          DR. BEEMAN: Okay.

12          CHAIR LEINENKUGEL: With your number  
13          one, examine the efficacy of the evidence-based  
14          therapy model.

15          DR. BEEMAN: We learned about that.  
16          Today we learned about how they come up with  
17          evidence-based protocols, and we talked a  
18          little bit about the scientific model and maybe  
19          some of the impediments that gives us when  
20          we're talking about complementary therapies  
21          because it's almost like they're antithetical  
22          to each other. We have to figure out a way to

1 sort of evaluate that, and then I think make  
2 recommendations around how do we think through  
3 that, and I think we got a good overview from  
4 Dr. Murphy on that today.

5 And then number two is really  
6 conducting the survey, and I think we learned a  
7 lot about the questions that are already  
8 answered but we also know that there's a lot  
9 that are not answered yet. And so one of the  
10 things we want to do is -- I should be using  
11 this I guess. I apologize. One of the things  
12 I think we need to do is determine how much of  
13 the material is already, are 80 percent of it  
14 already out there that we can just aggregate  
15 the data? And then we have to make a  
16 determination whether or not we have to ask for  
17 a waiver so that we can actually collect the  
18 data and, if so, how do we want to do that, in  
19 a quantitative way or a qualitative way? And I  
20 think we're going to have to sort of defer to  
21 the expertise to say, you know, how long would  
22 that take, does that make sense for us, and we

1       might have to be doing two things at one time:  
2       collecting all the data that's already extant,  
3       at the same time putting in a waiver request,  
4       and then, thirdly, thinking through whether or  
5       not it should be qualitative or quantitative.  
6       And I think I'd be turning to Dr. Murphy and  
7       her team on that.

8               Any questions or suggestions from  
9       anybody on that? Are we heading in the right  
10      direction?

11             And number three, why I really  
12      wanted to have some clinical people is a lot of  
13      these treatments are already being done, you  
14      know. We had a discussion about what's  
15      happening at NICOE, but it's happening across  
16      the country. And, you know, we wanted to see,  
17      you know, what the research is for equine  
18      therapy, you know, what's been documented in  
19      the record. I know that we're going to have  
20      some research done on that, the research of the  
21      research, and then really evaluate. And we  
22      have, you know, two researchers as part of the

1 team to say, you know, this makes sense, I  
2 mean, it passes the test for authentic research  
3 or this is kind of not so authentic.

4 And I think what we're also probably  
5 going to do is talk about some other  
6 complementary therapies. We talked about the  
7 use of cannabis, but there's probably a couple  
8 of other ones that are not included in here  
9 that, you know, like tai chi.

10 I'll tell you an anecdote that's  
11 kind of fun. I have an 80-year-old Catholic  
12 sister who's our best friend of our family.  
13 She teaches tai chi to poor African-American  
14 kids in Chester, and they've documented how  
15 much more attentive and how much better their  
16 schoolwork is going because they're calmer.  
17 And she's teaching the kids how to teach their  
18 parents when they go home.

19 So, you know, there's stuff that's  
20 happening all over the country that's, you  
21 know, maybe not well documented, but, you know,  
22 certainly seems to have some efficacy. And we

1       should see what's out there in the literature  
2       and see if, you know, that's just part of an  
3       overall -- and I think, from my perspective, is  
4       what we're trying to do is give the physicians  
5       and care providers a group of alternatives and  
6       complementary procedures that they can use and  
7       rely that this can help them in their  
8       armamentarium but not everyone might help every  
9       single person.

10               I mentioned my attention span on  
11       yoga, although I'm doing better. I wanted to  
12       add for the record, but since we're now on the  
13       record, is that I wanted the surgery just  
14       because I didn't want to improve my wife was  
15       right, but I proved that she was.

16               CHAIR LEINENKUGEL: Appreciate it.  
17       Thanks, Tom. And I have four and five, so it's  
18       study the sufficiency of the resources of the  
19       Department to ensure that the delivery of  
20       quality care for mental health issues among  
21       Veterans seeking treatment within the  
22       Department. This one is interesting because it

1 always goes back to when I look at resources  
2 it's always dollars. It's money available.  
3 And that's not always the case. It isn't in  
4 this. It's what you heard me ask yesterday  
5 that we need to have Dr. Carroll and Dr. Stone  
6 get back to us on.

7 And resources are also people. We  
8 need to diffuse and have the VA, and this  
9 commission can be something that I believe is  
10 the conduit for answering a question or  
11 answering the mail that's been left unanswered  
12 for 18 months. How many clinicians are we  
13 truly short, and what does short mean? I mean,  
14 there is a TO. Us military people know a table  
15 of organization. And then there is what's  
16 called the combat TO that you -- TO is what  
17 your desk world environment is, but then you  
18 have what marines would call combat. That's  
19 really who you're going to take to battle, and  
20 it might be 50 people less per battalion. Matt  
21 and Jamil, you know that. You're always a  
22 little short, but you somehow make up with

1        attachments and stuff.

2                    So, I mean, that has to be answered  
3        because the term in number that's been used and  
4        bantered for 18 months is counterproductive for  
5        the VA at this point and it's being misused.  
6        And I think we are mismanaging it as the VA.  
7        And I've had a side conversation already with  
8        the acting secretary. He's well aware of this.  
9        And I think that they have been waiting for  
10       somebody like Dr. Stone to come in, along with  
11       now Dave Carroll and his group, being put on  
12       notice to come up with some precise numbers for  
13       us because dollars are certainly not the issue.  
14       I mean, come on. There's 70-plus billion  
15       dollars that are out there for VHA usage.

16                   And the other thing I would like  
17        this group to look at and explore at some point  
18        is, when it says sufficiency, I also look at  
19        that as being are we effectively utilizing the  
20        dollars and resources? And, again, I'm going  
21        to use, just my own opinion is that we are not  
22        and it's the number of programs that are

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS

493 of 1083

1 currently being explored within the VA right  
2 now by a group of folks that have never been  
3 looked at before. And I can tell you the  
4 number that I was given was over a thousand  
5 programs, and maybe 900 of them are obsolete or  
6 are inconclusive or are unfunded and never-  
7 ending. I don't know the answer to that. I  
8 mean, these are all hypotheticals, but there  
9 are some easy numbers that were looked into  
10 over the last three weeks and they're nowhere  
11 near completion yet. But I would think and  
12 know this incoming secretary is going to be  
13 very adamant about getting to, you know, right-  
14 sizing and what we refer to as re-purposing  
15 dollars towards true Veteran care.

16 So that's why I think four is really  
17 important for us to take a leadership role in  
18 maybe providing that some of that early  
19 guidance and recommendations, and that's why  
20 this would not necessarily just be an end of  
21 the study report-out 18 months from now. This  
22 could very well be one of these ongoing rhythms

[www.nealrgross.com](http://www.nealrgross.com)

1       that we start as a commission that we would  
2       probably and should vote upon. Maybe it's next  
3       meeting. Do we start reporting out some of our  
4       findings not only to SVAC and HVAC, which is  
5       called for in the legislation, but do we do it  
6       directly with a phone call along with, under  
7       FACA rules, the DFO or ADFO about some of the  
8       early findings or early recommendations that we  
9       have. And I think that that would be, I don't  
10      know if it's a first for a commission to do  
11      that, but I think it's something to explore  
12      and, at least for us, to noodle over until we  
13      come back in the month of August.

14               So five is another one of the  
15      current treatment resources available within  
16      the Department to assess. There's a lot of  
17      commonality. I looked at at the end of this  
18      with what, Tom, you have with three that I gave  
19      over to you. So, I mean, whoever wrote it  
20      tells me that they did it for a reason, right?  
21      They wanted to end with making sure that the  
22      efforts of the Department to expand

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS  
1323 RHODE ISLAND AVE., N.W.

495 of 1083

1 complementary and integrative health treatments  
2 viable to the recovery of Veterans, which is  
3 really what the act is, COVER, expedited  
4 recovery of Veterans, with mental illness  
5 issues as determined by the secretary to  
6 improve the effectiveness of treatments offered  
7 by the Department.

8 So it's really taking a look at  
9 diagnosing the VHA structure currently as-is.  
10 Are we doing it robustly? Are we doing it with  
11 50 percent effort? We need to call out some of  
12 these things.

13 But the other ones are just numbers  
14 and percentages, and these are the other ones  
15 that I think are just as hard as some of the  
16 surveys. So, again, it goes back to surveying  
17 and then trying to get the right numbers.

18 Now, these are numbers, in my  
19 opinion, that DHA should own, because it's all  
20 interdepartmental. It's not the Veterans that  
21 are going out to private care, and it's not the  
22 Veterans that are not receiving care. These

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS  
1323 RHODE ISLAND AVE., N.W.  
WASHINGTON, D.C. 20005-3701

496 of 1083

1 are the ones that are currently receiving care.  
2 So, again, I would lean on Rick Stone, Dave  
3 Carroll, and current group.

4 But remember I also said I don't  
5 always trust the VA numbers. I said that early  
6 on in yesterday's meeting. And so I may ask  
7 you to have a vote or I may ask the DFO,  
8 depending on the protocol, to have an outside  
9 consultant group after we discuss it and vote  
10 on it to possibly come in to take a look at  
11 that just to fact check. And I'm up in the air  
12 about it at this point. I've made no decision  
13 whatsoever. It's a washout because, again,  
14 I've seen numbers that totally conflict with  
15 what reality is, and some of their numbers are  
16 spot-on. But it's just, once you lose that  
17 trust factor, it's hard to regain.

18 So I want to make sure that we're  
19 giving the best effort as the COVER Commission  
20 back to the people that wrote the legislation  
21 and to the group of Veterans that we're going  
22 to actually expedite their recovery. And the

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS  
1323 RHODE ISLAND AVE., N.W.  
WASHINGTON, D.C. 20005-3701

497 of 1083

1 key is expedite recovery. And so I think that  
2 we need to always keep that in mind.

3 So, again, I will work on this over  
4 the next couple of weeks as far as naming some  
5 people or looking at some people. And Tom and  
6 I will work that conversation before we come  
7 with recommendations or finalizing it with a  
8 DFO and ADFO. Does that make sense, Tom? Is  
9 the rest of the Commission comfortable with  
10 that? Good.

11 And, again, it would be nice to have  
12 some clinicians, you know, on that. But I will  
13 leave both available for you for number three.  
14 I think there's going to be a lot of subject  
15 matter experts and also the finance people have  
16 changed at VA, and the VHA finance people have  
17 changed, as well. So they're looking at things  
18 differently than the past. That's just normal  
19 practices.

20 DR. MAGUEN: I was going to say I'd  
21 also make some recommendations for some of the  
22 suicide people who are also clinicians and sort

1 of have national roles, as well? So for that  
2 number four, yeah.

3 CHAIR LEINENKUGEL: Yeah.

4 DR. MAGUEN: Sorry. For five. So,  
5 yes, so I think that that will be important  
6 because it's interesting that it's specifically  
7 focused on suicides in particular for number  
8 five.

9 So the other thing that I was going  
10 to say I'm going to on Friday an all-day  
11 training on suicide that is an update for  
12 clinicians. And so I can also report back our  
13 next meeting just so everyone is aware of what  
14 the latest is.

15 CHAIR LEINENKUGEL: Yes, that would  
16 be great and very helpful and we would expect  
17 that. So thank you for offering that. And  
18 it's timely, as well.

19 DR. MAGUEN: Yes, exactly. So --

20 CHAIR LEINENKUGEL: Also remember,  
21 and I think you all got this, why Drew  
22 Trojanowski is in as an advisor from the White

1 House, this is a White House initiative that  
2 hopefully is going to be completed since the  
3 President signed off on it in January, the VA  
4 was supposed to have the plan ready by March  
5 and the plan was not ready until last month.  
6 And so this guy has been, as Matt knows, under  
7 the gun to complete this in a real short amount  
8 of time.

9 And the basis of the EO now between  
10 DoD and VA is very, very good from where it was  
11 four months ago. And I think that having  
12 Wilkie coming underneath Mattis and getting  
13 Mattis's team re-energized for what I call two  
14 VA-DoD collaboration, and you got to remember  
15 this is game-changing because what the EO is  
16 calling for for the first time ever, the  
17 biggest part of it is those Veterans that are  
18 leaving the service are going to automatically  
19 be pre-enrolled, I use that loosely, into the  
20 VA system. So whether it's the TAP process or  
21 whatever, Joe and Suzie departing the Army are  
22 going back, one to Minneapolis and one to

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS  
1323 RHODE ISLAND AVE., N.W.  
WASHINGTON, D.C. 20005-3701

500 of 1083

1 Salem, they're both going to have a home record  
2 established with already where to go to the VA  
3 in Salem and Minneapolis and for the following  
4 year, regardless of what their rating is for  
5 the VA, they are going to receive mental  
6 healthcare at any point in time during that  
7 first year. So, I mean, that's game-changing.

8 Trust me, as we all know that have  
9 worked in government, it sure sounds good.  
10 It's going to be really difficult going through  
11 just the pre-enrollment process now and then  
12 getting Johnny and Susie fully onboard because,  
13 let's face it, a lot of them are the 23- and  
14 24-year-olds, the only thing on their mind is  
15 to get home. And, you know, now we have to  
16 really what I call sell and market this  
17 executive order, thus that is why this will be  
18 a big public initiative, whether it's at the  
19 White House South Lawn or East Lawn, it doesn't  
20 matter, but it will be a big announcement. And  
21 also DoD is, for the first time, supposed to  
22 play big in the field of you are leaving the

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS  
1323 RHODE ISLAND AVE., N.W.  
WASHINGTON, D.C. 20005-3701

501 of 1083

1 service, thank you very much, rather than, Matt  
2 and my days and probably Tom's days of, hey, we  
3 don't really want you to leave yet, we want you  
4 to go see, you know, you're going to get a  
5 command next, why don't you think about that,  
6 or what did we call those guys, the gunnery  
7 sergeants for the enlisted guys? It's been 40  
8 years. No, no, it was the person that would  
9 try and re-enlist. There's a term for that  
10 person, but you always tried to grab them  
11 before they exited. And then once they told  
12 you they weren't going to re-enlist or take the  
13 command, it was get out of here.

14 So that's what's coming. So by the  
15 time we're meeting in August, I think you're  
16 going to see and hear a lot more probably,  
17 hopefully from Drew, unless he's just running  
18 around trying to do things, but also you should  
19 be made aware Matt and the Bush Heritage  
20 Foundation has been very active and proactive  
21 in working with Drew, as have some other what I  
22 call subcommittee groups, subject matter

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS  
1323 RHODE ISLAND AVE., N.W.  
WASHINGTON, D.C. 20005-3701

502 of 1083

1 experts, in helping draw all of this together.  
2 So it's not just VA-DoD collaborating, it's  
3 groups like Matt with the Bush Foundation or  
4 the Heritage Foundation and certainly others  
5 that have come together and said we know how to  
6 do this, we know where the trapdoors are, and  
7 we know where the barriers are, and let's help  
8 you. And they've been a huge help in a short  
9 amount of time.

10 DR. MAGUEN: Can I ask a quick  
11 question about that critical bridge that you  
12 just talked about between the DoD and the VA?  
13 Is the EO saying that if you screen positive  
14 then you're automatically enrolled, or is it  
15 going to include if you just finish service  
16 you're automatically enrolled?

17 CHAIR LEINENKUGEL: The latter.

18 DR. MAGUEN: Oh, that's fantastic.  
19 Okay. So, yes, so it will capture everyone.  
20 So, basically, we will now be able to track all  
21 Veterans, which is unbelievable.

22 CHAIR LEINENKUGEL: You are correct.

1 DR. MAGUEN: Amazing.

2 CHAIR LEINENKUGEL: And this came  
3 from the State of Arizona. And if you look at  
4 the Arizona coalition and what they've done, I  
5 reiterated that a couple of times yesterday, it  
6 was the most fascinating thing that I've seen  
7 because there are three outstanding leaders  
8 that lead that process and don't take no for an  
9 answer. I know them personally. Drew was the  
10 one that introduced them to me over a year ago.  
11 I went to one of their coalition with Veterans.  
12 You heard me talk about the story of the  
13 traumatized Veteran lady. She was from that  
14 group from Phoenix. It was that VA.

15 So, I mean, this is game-changing  
16 stuff that we're involved in. So on top of it,  
17 I only say that because there's an intersection  
18 with suicides with the mental health, and  
19 there's a huge intersection, and that's why  
20 Drew wanted to be part as an advisor of the  
21 COVER Commission. And I absolutely said yes  
22 and called Sheila, just so you have full
